

MASUD RANA NAYEEM

FULL STACK DEVELOPER · AI / ML ENTHUSIAST · RESEARCHER

Computer Science & Engineering · Daffodil International University · Expected 2026

GitHub: github.com/masudrananayeem · Portfolio: [personal portfolio website](#)

PROFILE

Full-stack developer focused on building production-ready web platforms, scalable application architecture, and applied AI/ML prototypes. Interested in software architecture, modern UI/UX, cloud deployment, developer tooling, and research-driven product development.

CORE SKILLS

React · TypeScript · JavaScript · Node.js · Firebase / Firestore · Cloudflare Workers · REST APIs · Git / GitHub · Tailwind CSS · Framer Motion · GSAP · Responsive UI · Software Architecture · AI / ML

SELECTED PROJECTS

BloodBridge

Blood donor and seeker platform with blood-group and location search, emergency donor discovery, privacy-aware contact flow, donation cooldown logic, and donation history.

BDpedia

Bangladesh-focused digital guide covering districts, places, history, culture, rivers, travel resources, galleries, and editorial content with an admin-manageable content system.

Personal Portfolio Platform

Animated portfolio system with responsive UI, dark/light themes, GitHub contribution integration through a Cloudflare Worker, Firebase-backed content, and a separate admin application.

EDUCATION

B.Sc. in Computer Science & Engineering — Daffodil International University · Expected 2026

Academic interests: Software Architecture & Design Patterns, Web Engineering, UI/UX Design, Applied Machine Learning.

RESEARCH & INTERESTS

Applied machine learning, computer vision, software architecture, scalable web systems, human-centered interface design, cloud deployment, and AI-assisted developer workflows.

TECHNICAL APPROACH

Builds systems with reusable components, typed interfaces, responsive-first layouts, secure server-side integrations, maintainable project structure, and deployment-aware development practices.
